Alcohol Use Disorder (AUD) and Its Impact on Health

Date: April 10, 2025

Time: 6:00 p.m. – 7:30 p.m.

Site: Manchester Memorial Hospital or Live Webinar (Zoom)

Alcohol related problems are among the most significant public health issues in the country, affecting about 15 million adults in the U.S. Approximately 88,000 people die from alcohol related causes, making it the third leading preventable cause of death in the nation. Alcohol Use Disorder (AUD) can be mild, moderate, or severe based on the number of symptoms a person experiences. Join Psychiatrist, Dr. Luis Gonzalez as he provides an overview of symptoms, causes, its impact on safety and well-being, ways to prevent alcoholism and treatment options.

Every year, we dedicate time and resources to enhance the overall health and wellness of our communities by offering FREE educational programs to individuals and families. We invite you to join us and our healthcare providers in one of our many health education lectures.
